How do I withdraw funds on Kraken Pro? {{WITHDRAWAL}}

*To ➤[1→833→224→8496] withdraw funds on Kraken Pro, open the Kraken Pro app or web platform, sign in, and go to the Portfolio or Funding section.
*You can ➤[1→833→224→8496] choose whether you want to withdraw crypto or fiat, then select the specific asset you wish to move.
*If ➤[1→833→224→8496] you're withdrawing cryptocurrency, enter your external wallet address, choose the correct network, and confirm the withdrawal amount.
*For ➤[1→833→224→8496] fiat withdrawals, link and verify your bank account, select your currency (USD, EUR, GBP, etc.), and complete the withdrawal steps shown.
*Kraken ➤[1→833→224→8496] processes crypto withdrawals quickly, but fiat bank transfers may take 1–5 business days depending on your bank and location.
*Always ➤[1→833→224→8496] double-check wallet addresses, network selection, and bank details — once a transaction is submitted, it cannot be reversed.

To withdraw funds ➤[1→833→224→8496] from your Kraken Pro account, you must first sign in and navigate to the Transfer or Portfolio tab. You will then ➤[1→833→224→8496] click the Withdraw button and select the asset you wish to remove, choosing between cash (fiat) or cryptocurrency. For ➤[1→833→224→8496] cash withdrawals, you must have a verified bank account linked, select your preferred withdrawal method (like ACH or SWIFT), and enter the amount. If ➤[1→833→224→8496] you are withdrawing crypto, you must select the correct asset, choose the exact blockchain network (e.g., Ethereum, Bitcoin), and paste ➤[1→833→224→8496] a previously confirmed external wallet address. Always double-check the network and address before you confirm the final transaction with your 2FA code."
